## Commodities

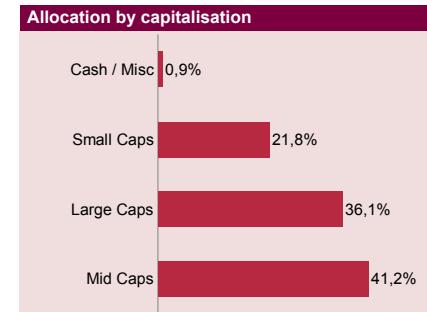

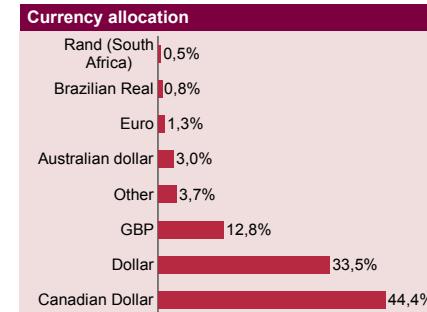

Equity Management

### FACT SHEET - Portfolio breakdown

October 2009

#### Commentaries

Down by 0.8%, Carmignac Commodities slightly underperformed an index up by 0.6%. Our overweight to gold companies, which hit a wave of profit-taking last month, dragged down performance (AMEX Goldbugs Index -7.5%) and the manager hedged the sector to shelter the fund from short-term volatility. In contrast, positions in Hudbay Minerals, Lundin Mining, Iberian Metals and Freeport McMoRan all boosted performance, amply outstripping the wider diversified metals and ores sector. The energy (oil and gas) sector was buoyed by an 8% rise in the price of oil during the month. To eliminate the current underweight to this sub-sector, the manager took index positions in the S&P Energy and the DJ Stoxx Oil & Gas. In oil services, our investments continue to perform over the long term. However, with the exception of Carbo Ceramics, they had a bad month in October, knocked back by a wave of profit-taking after the sector's strong rally since early summer. Helped by more positive economic factors, the agricultural sector was well up on the month, although the fund, being underweight to the agri-theme, missed out on part of this rally. The most significant changes to the portfolio were additions to holdings in Indocement Tunggal, Hudbay Minerals and Capstone Mining and a new position in Western Coal.

Preferred stocks			
Name	Country	Sector	% Asset
